bassam-portfolio2.vercel.app | github.com/Bassam-Elsayed | linkedin.com/in/bassam-elsayed-8227482b5

Professional Summary

Front-End Developer with **3+ years of experience** in React, Next.js, and TypeScript. Senior Front-End Developer & Team Leader at ENS, leading architecture and code quality across products including **ENSmenu (1,000+ users)**. Strong in reusable UI architecture, performance, and Arabic/English RTL applications, with supporting experience in Node.js and Express.

Technical Skills

Front-End: JavaScript, TypeScript, React, Next.js, HTML5, CSS3, Redux

UI & Styling: Tailwind CSS, Sass, Bootstrap, shadcn/ui, Framer Motion, GSAP

Architecture & Performance: Component Architecture, State Management, SSR/SSG/ISR, Core Web Vitals, Accessibility, SEO, i18n, RTL

Back-End & Data: Node.js, Express.js, REST APIs, Socket.io, SQL Server, MongoDB, Supabase, Sanity

Tools: Git, GitHub, Vercel, Figma, Code Review

Professional Experience

Senior Front-End Developer & Team Leader | ENS

Tanta, Egypt | Oct 2024 – Present

- **Technical leadership:** task breakdown across the front-end team, pull request reviews, Git branching and coding standards, and the structural decisions taken before a project starts.
- **Architecture:** rendering strategy (SSR, SSG, ISR), routing, state management, and component structure, plus a shared component library that newer products are assembled from.
- **Delivery:** own the front end of company products, including ENSmenu and bilingual Arabic/English client sites, from design handoff to release.
- **Production engineering:** server-side data fetching, smaller client bundles, image sizing, and layout-shift fixes; responsive and accessibility review against Figma handoffs.
- **Supporting back-end:** REST endpoints in Node.js and Express over SQL Server, MongoDB, and Supabase when a feature needs them.

Front-End Developer | Freelance

Remote | Aug 2025 – Present

- Deliver client web applications end to end: build, deploy on Vercel, and handle post-launch changes.
- Build marketing sites and storefronts where search visibility drives the rendering choice, using static generation and metadata.
- Handle scoping, estimates, and technical decisions directly with clients.

Selected Projects

ENSmenu – Digital Menu Platform (SaaS) | ensmenu.com

Production platform for restaurants and cafes, serving 1,000+ users.

- Built the customer-facing QR menu and the owner dashboard on one shared component layer.
- Built the data-heavy dashboard interfaces: product and category management, pricing, filtered tables, image handling, and analytics views.
- Integrated the front end with REST APIs over SQL Server.

Next.js, TypeScript, Tailwind CSS, Node.js, Express, SQL Server

Topaz Events | topazuae.com

Marketing site for an event management and AV production company operating across the UAE.

- Built the long-scroll marketing interface on the App Router: service pages, portfolio sections, equipment showcase, and FAQ.
- Built the intro and scroll animations in Framer Motion, kept stable across breakpoints, and a three-step enquiry form with step state and validation.

Next.js (App Router), TypeScript, Tailwind CSS, Framer Motion

KOGNS | kogns.com

Bilingual English/Arabic site for a software engineering company.

- Built the localization architecture: locale-aware routing, per-locale fonts, and a layout mirrored for RTL rather than translated text only.
- Built the filterable project archive, case study pages, and video-backed hero.

Next.js, TypeScript, Tailwind CSS, i18n, Vercel

Lapip Store | lapip.net

E-commerce platform with product catalog, cart, and checkout.

- Built the storefront: catalog browsing, cart state, and the checkout flow through to payment.

Next.js, Tailwind CSS, Node.js, Express, SQL Server

Morsh-D | morsh-d.com

Static storefront with no custom back end.

- Built the product presentation and all pages on static rendering, with image optimization for load time.

Next.js, TypeScript, Tailwind CSS
